

5kw solar cell

How much does a 5kw solar panel system cost?

A 5kW solar panel system costs around £11,500 to buy and install. If you want to add a battery to this system, it'll push the price up by around £2,000, for a total cost of £13,500.

How many solar panels are in a 5kw Solar System?

A 5kW solar system is made up of 20 solar panels, assuming that the panels have 250-watt capacity. The size of each panel will be approximately 1.6 m x 1 m, so at least 32 m² of roof space is needed to suit the space needs of this system.

Is a 5kw Solar System right for You?

A 5kW solar panel system can massively reduce your electricity bills, and is suitable for the average four-bedroom household. However, most homes don't align with the average, so make sure the size of your system is based on your current and future electricity consumption, rather than averages.

Can a 5kw Solar System be used with a battery?

Pairing a 5kW solar system with a battery in the UK allows you to significantly reduce your independence on the national electricity grid and lower your energy bills. To ensure higher savings in the long run, be sure to choose one of the best solar batteries on the market.

How much electricity does a 5kw Solar System produce?

Yes! A 5kW solar panel system can produce around 4,250kWh per year on average, which can power standard household appliances such as washing machines, hot water heaters, and refrigerators and satisfy the needs of a medium to large household.

Can a 5kw solar system save you money?

This size of the system can provide more than enough energy to the average home in the UK, which usually has 3 bedrooms. Aside from the savings on electricity, a 5kW system with a battery can also allow for earnings from solar panel grants and schemes like the Smart Export Guarantee.
