

Batteries cannot be taken out of the battery cabinet

What should I know before moving battery cabinets?

Battery cabinets contain non-spillable batteries. Keep units upright. Do not stack. Do not tilt. Failure to heed this warning could result in smoke, fire or electric hazard. Call 1-800-LIEBERT prior to moving battery cabinets (after initial installation).

What precautions should you take when using a battery?

Follow all battery safety precautions when installing, charging or servicing batteries. In addition to the hazard of electric shock, gas produced by batteries can be explosive and sulfuric acid can cause severe burns. Remove watches, rings and other metal objects. Use tools with insulated handles. Wear rubber gloves and boots.

What to do if a battery cabinet is damaged?

In case of damage, notify immediately the carrier. The packing container of the battery cabinet protects it from mechanical and environmental damage. Preserve the packaging for later re-use. Refer in each moment to the electrical scheme at section 3.

How are battery cabinets connected?

For cabinets ordered as connected (battery cabinets will bolt to each other), the positive and negative busbars are connected between battery cabinets with the supplied busbar connector extensions. See For cabinets that are ordered as stand-alone, customer must supply all the interconnecting cables and hardware.

How do you enter a battery cabinet?

Cables may enter the battery cabinet from the top or bottom. Cable entry is made possible by installing conduit to the removable plate fitted at the top or bottom. See 3.0 - Installation Drawings. Depending on the site layout, the battery cabinets can be cabled several ways. See Figures 2 through 4. !

What should you do if a battery is grounded?

Remove watches, rings and other metal objects. Use tools with insulated handles. Wear rubber gloves and boots. Do not lay tools or metal parts on top of batteries. Disconnect charging source prior to connecting or disconnecting battery terminals. Determine whether the battery is grounded. If it is grounded, remove source of ground.
