

How does the batteryguard cabinet work?

The Batteryguard cabinet is also safe and easy to use for new personnel. It's simple: when you need to charge up your battery, you just open the cabinet and place the battery on the charger. Because the charger cables are fixed in the cabinet, you can be sure that you are always using an original charger for the battery.

What is a battery line safety storage cabinet?

The BATTERY line safety storage cabinets are specially designed for safe storage and charging of lithium-ion batteries.

How many batteries can a batteryguard cabinet hold?

Whether you have a great many batteries or just a few, large or small, the Batteryguard cabinet offers a solution for every situation. We offer compact models that charge 2 to 10 batteries and a spacious double-door safe where you can store up to 20 batteries.

How does a battery station work?

The BATTERY station models are set up for chargers, with a fuse protected and ready to plug in power supply. The air heated by charging is extracted at every cabinet level. In the event of an accident, the ventilation ducts can also be used to safely discharge the flue gases and outgassing.

Why do I need to close the cabinet doors if a battery catches fire?

Because the charger cables are fixed in the cabinet, you can be sure that you are always using an original charger for the battery. It is important that you always close the cabinet doors, because if a battery catches fire, that fire is kept inside.

How many batteries can a batteryguard safe hold?

We offer compact models that charge 2 to 10 batteries and a spacious double-door safe where you can store up to 20 batteries. Batteryguard is based on a fire-resistant design, so that our safe satisfies the strictest standards and guidelines.
