

Do you have low battery anxiety?

LG has dubbed this condition 'Low Battery Anxiety' and says that nearly 9 out of 10 people suffer from the fear of losing power on their phone. The survey found 41 per cent of people fear missed calls the most when faced with a dead battery. And 17 per cent of males missed a match on a dating app because their phone died before they could swipe.

Is battery anxiety a real thing?

Battery anxiety isn't entirely unreasonable--the tech people rely on daily is objectively not great. Even if you splurge on top-of-the-line tech, you're still buying a battery system developed in the 1970s. While major progress has been made, lithium-iron batteries are heavy, explosive, corrosive, and difficult to dispose of.

Are battery-powered devices causing 'nomophobia'?

In just a few decades, battery-powered devices have become the main drivers of people's lives. Without them, we feel just as stranded as a dead Tesla. Anxiety about dying batteries is the major trigger for "nomophobia," or fear of being without a smartphone.

Is electric-vehicle range anxiety a real problem?

According to Malte Jung, who studies human-robot interactions at Cornell University, the issue with electric-vehicle range anxiety is less that people are uncomfortable with battery power and more that our devices seem to lie to us. When drivers fill their tanks with gas, their experience tells them roughly how far that gas can carry them.

Do you have range anxiety if you drive an electric car?

Range anxiety typically involves the specific fear of running out of battery while driving an electric vehicle. But look around. Not everybody drives electric cars, but nearly everybody has a cellphone, and the fear of that little percent bar dropping to 0 is ubiquitous and acute. Your personal range extends only as far as the nearest charger.

What is range anxiety & why is it a problem?

Now that it had short-circuited so spectacularly and unpredictably, he was doomed to a chronic case of range anxiety--monitoring the replacement battery constantly and charging it often. Range anxiety typically involves the specific fear of running out of battery while driving an electric vehicle. But look around.
