

Why is my Surface Pro 8 Battery showing a 'weak charging state'?

If the battery icon on your Surface Pro 8 is showing a 'weak charging state' message, it could indicate that your laptop is not receiving sufficient power from the charger. Here are some steps you can take to troubleshoot the issue: Use the Original Charger: Ensure that you're using the charger that came with your laptop.

How do you know when a battery is charging?

No other way besides swapping out the battery. If it's the battery charging circuit then you know it when it starts charging since most companies ship the battery in a semi-discharged state (50% charge).

How can HP battery check help?

Our automated Virtual Assistant can also help diagnose battery issues, or you can explore the self-guided solutions on this page. HP Battery Check provides a simple but accurate test of the battery for notebooks and provides advanced information on the state of the battery and any maintenance action that may be required.

Why is my laptop battery not charging?

Laptop batteries and adapters can malfunction in several ways. The battery may stop charging or won't hold a charge, or the AC adaptor can stop working. To identify and solve your issue, run the Battery Check diagnostic below.

What should I do if my HP laptop battery fails?

If the battery is not working or has failed and the computer is within the Warranty Period, contact HP Technical Support. Check your computer's Website Support for important advisories and bulletins regarding battery issues. NOTE: The online database results do not impact the actual contract.

How do I know if my laptop is bad?

The laptop has no power unless plugged into a power outlet. It works fine when plugged in and the charging LED is steady white. I do need to be careful, as even a slight bump to the power cable will turn off the laptop instantly. I've inspected the internals and there are no obvious signs of fault (loose cables, blown components, damaged traces etc).

We would like to share some of the most frequently asked questions about: Battery Reports, Hold a charge, Test and Calibrating Battery . Check out this link: [Is your ...](#)

To check if your battery is bad or not, follow these steps: Open phone dialer and type \*#0228# If the battery 'level block' states (0 ~ 8), then your battery is good. If your battery level block is (0 ~ 7) or lower then your battery is not good and you need to change it. Don't want anyone to go pay to change a battery if it's still good.

I did a system test using the HP PC Hardware Diagnostics Window and the battery check got cancelled with the message logic state: VERY\_WEAK and charge state: OK

Restart (not shut down) the laptop and check if the battery is charging correctly. If the battery is still not charging, then you will need to contact HP Support, there is a hardware ...
