

What is the current electricity demand in South Tarawa?

22. The present yearly electricity demand in South Tarawa is around 29 GWh and is expected to grow by 2% annually. The total power rating available to PUB is around 5MW, sufficient to meet the above yearly demand when all diesel generation sets are operational.

Why is South Tarawa project important?

This is a critical natural asset for South Tarawa and the project will help to reduce the decline in water availability and water quality as well as avoid the risk of further encroachment of incompatible land uses and contamination.

Who generates electricity in Kiribati?

Sector context. Grid-connected electricity in Kiribati's capital, South Tarawa, is generated and distributed by the Public Utilities Board (PUB), a state-owned electricity and water utility.

Why is electricity so expensive in Kiribati?

Of the 7,877 households in South Tarawa (44% of total households in Kiribati), 72.4% are connected to grid electricity. Access is largely for lighting, and that lighting is often insufficient, inefficient, and expensive. The high electricity cost has suppressed demand and has hindered growth in the commercial and tourism sectors.

Why are there no independent power providers in Kiribati?

Also, despite the potential for revenue generation from the high electricity costs, there are currently no independent power providers in Kiribati. Barriers to private sector investment include (i) lack of an enabling policy and regulatory framework, (ii) credit worthiness of PUB as an off-taker, and (iii) small transaction sizes.⁸

South Tarawa Renewable Energy Project (FFP KIR 49450) CLIMATE CHANGE ASSESSMENT 8.1 BASIC PROJECT INFORMATION Project Title: South Tarawa Renewable Energy Project Project Cost (\$ million): US\$14.7 million Location: Kiribati (South Tarawa) Sector: Energy Theme: Energy security, renewable energy generation, solar ...

The South Tarawa Renewable Energy Project (STREP-the project), ADB's first in Kiribati's energy sector, will finance climate-resilient solar photovoltaic generation, a battery energy storage system, and will support institutional ...

The South Tarawa Renewable Energy Project (STREP), ADB's first in Kiribati's energy sector, will finance climate-resilient solar photovoltaic (PV) generation, a battery energy storage ...

2025 south tarawa energy storage power station (16% penetration). For South Tarawa, installed PV is 1.5 MW

compared to 5.5 MW diesel (9% penetration). Funafuti needs 7.6 MW PV and 14 MWh of BESS while South Tarawa needs 25 MW PV and 32 MWh of BESS to reach their target of 100% renewable energy penetration by 2025 and 2030, respectively. Tonga aims

The South Tarawa Renewable Energy Project (STREP-the project), ADB's first in Kiribati's energy sector, will finance climate-resilient solar photovoltaic generation, a battery energy storage ...

Access of South Tarawa's population to safe, climate-resilient water supplies increased. Progress Toward Outcome Construction of the project's 2 desalination plants, at Betio and McKenzie, is complete. Commissioning of the McKenzie plant is ongoing, and the plant is expected to commence delivering water to the residents of South Tarawa before ...
