

Can a Mercury engine use a lithium iron phosphate battery?

As of 9/26/2022, Mercury has issued Service Bulletin 2022-19 stating that the listed engines will be permitted to use a Lithium Iron Phosphate Battery that is designed for engine cranking, as long as it meets the listed specifications: -2.1L 75-115hp Fourstroke, ProXS and SeaPro Models -3.0L 150hp Fourstroke, ProXS and SeaPro

What is a marine starting battery?

A marine starting battery provides a quick and powerful burst of energy over a short period of time to start the engine and is designed to be rapidly recharged by the engine's alternator. A starting battery should not be used to power a trolling motor or other onboard accessories.

Does Mercury void a warranty if a lithium ion battery is used?

Mercury will not void a warranty if a lithium iron phosphate dedicated cranking battery is used. This comes right from a dealer who services Mercury as well as sells and installs lithiums. Note the words "Lithium Ion"; Not LiFePo4...lithium ion is a very unstable chemistry. Lithium iron phosphate is super stable.

Why do batteries need distilled water?

Regular tap water introduces minerals that can clog the battery plates. Choosing the right water is essential for effective battery maintenance and to extend its life and performance. Lead-acid batteries require distilled water.

How long does a marine starting battery last?

Expect to get four to five seasons of life from a conventional lead-acid marine starting battery that has been well-maintained and not subjected to excessive vibration or impact in rough water by being properly secured in the boat. A load test is the best way to gauge the health of a battery that has seen a few seasons of use.

Can I use a lithium ion battery for a Mercury outboard?

See the update at the bottom of this post! Service Bulletin 2021-06 (No Lithium Ion Batteries are to be used as Starting Batteries for Mercury Outboard or Mercruiser Sterndrive products). This is both for safety reasons and warranty issues, and is clear and unambiguous that only AGMs are acceptable for modern Mercury outboards.
