

Should a battery pack be replaced?

If a relatively new pack has only one defective cell and a replacement is located, exchanging the affected cell makes sense. With an aged battery, however, it's best to replace all cells. Mixing new with old causes a cell mismatch that has a short life. In a well-matched battery pack all cells have similar capacities.

Can a battery pack be rebuilt?

Get your battery pack rebuilt with County Battery Services pack rebuilding service. Whether it is Ni-Cd, Ni-Mh or Lithium, we can repair and improve your battery packs to an upgraded standard by exchanging your internal cells to brand new quality battery cells of the same or higher capacity.

Should I replace the cells in my product's battery pack?

By replacing the cells in your product's battery pack, you can save money and reduce waste. Here's a DIY solution.

What happens if a battery pack fails?

Battery packs are composed of several smaller battery cells, and when certain cells fail due to overcharging or general wear, the entire cell can be swapped out with a new one. It's important to use quality replacement batteries that match the capacity and voltage requirements set by the manufacturer of the original lithium battery pack.

Do you repair or refurb a battery pack?

We recell, refurb, and repair Lithium (Li-Ion), Ni-Mh and Ni-Cd battery packs.
