An aluminum electrolytic capacitor consists of a wound capacitor element, impregnated with liquid electrolyte, connected to terminals and sealed in a can. See Figures 1 and 2. Voltage ratings are classified as < 100 VDC for low voltage, 101-250 for mid-voltage and 251-700 for high voltage. Typical case volumes

Shanghai Yongming electronic company established in 2001, is a leading manufacturer in providing and selling diversified aluminum electrolytic capacitors.

SHINING Aluminum Packaging Co., ltd, is a global leader in customized aluminum packaging solutions that had fulfilled the needs and expectations of many of the world's most well-known brands. Phone: 0086-574-87811501

An Aluminum Electrolytic Capacitor is a type of capacitor that contains just a few essential parts: aluminum foil, electrolytic paper, an aluminum oxide layer, and two terminals (a cathode and an anode). Aluminum Electrolytic Capacitors work by using the polarity between the two terminals to maintain high capacitance within the component.
