

What is the Chicago energy benchmarking ordinance?

Under the Chicago Energy Benchmarking Ordinance, the City reports annually on energy findings and trends, and the ordinance authorizes the City to share building-specific data with the public beginning with buildings' second year of reported information. Benchmarking Compliance The compliance deadline for benchmarking reports is June 1.

What is the Chicago energy rating system?

The Chicago Energy Rating System improves the visibility and transparency of the information reported under Chicago Energy Benchmarking. Some of the benefits of this update are provided in this summary, and this FAQ document provides answers to frequently asked questions. The full ordinance can be downloaded [here](#).

Will energy storage save consumers money?

Advancing energy storage technologies is one of the institute's three foundational pillars, alongside climate change mitigation measures like geoengineering. In Illinois, utility-scale batteries will require subsidies to get off the ground. Eventually, however, they are anticipated to save consumers money.

How much battery storage does Illinois need?

A new analysis from the Union of Concerned Scientists estimates Illinois will need at least 3,000 megawatts of storage in the next five years and over 9,000 megawatts by 2035. A major, insurmountable downfall of lithium-ion batteries is that they're made from scarce critical minerals: lithium, cobalt and nickel.

Will a bill increase battery capacity on Illinois' electric grid?

Sen. Bill Cunningham plans to push forward a bill to significantly increase the battery capacity on Illinois' electric grid. He considers it a necessary complement to the 2021 Climate and Equitable Jobs Act, which set a 2045 goal to shutter fossil fuel plants and expand renewable energy but did not include significant provisions for energy storage.

Why did Elgin Energy Center shut down?

The Elgin Energy Center, a natural gas-fired power plant, was supposed to shut down in June 2025, but it rescinded those plans in September shortly after northern Illinois' grid operator announced record-high electricity prices next year. There isn't enough supply to meet demand.
