

Are Chinese solar panels cheaper than US solar panels?

Yet,while Chinese solar panels are 20%cheaper than their American equivalents,this number is not the difference between the success and failure of the U.S. solar energy industry. High interest rates and the permitting quagmire must also be addressed. Ending China's dominant position in the global solar market is not possible.

Even with the support of subsidies and tariffs,U.S. solar manufacturers struggled to compete with the flood of cheap solar panels pouring out of China into the global market. While some argue that the U.S. should loosen restrictions on cheap Chinese solar panels to accelerate renewable energy deployment,this approach is unsustainable.
