

## **Does the battery cabinet have high technical content**

What is the purpose of a battery cabinet?

Battery cabinets are used primarily for aesthetic reasons to house batteries in an office environment. They are typically used with valve regulated lead acid (VRLA), semi-sealed batteries that form an integral part of the UPS. These cabinets are manufactured from mild steel and are then powder coated to a desired color.

How many lithium battery cabinets can be connected in parallel?

A maximum of 15 SmartLi 2.0 lithium battery cabinets can be connected in parallel. When multiple cabinets are connected in parallel, only the master cabinet has an LCD. Easy capacity expansion: Batteries can be added along with load increase by stages. New and old battery cabinets can be connected in parallel.

How many smartli lithium battery cabinets can be connected?

Scenario where SmartLi 3.0 lithium battery cabinets are deployed outside the smart module: One integrated UPS can connect to a maximum of 10 SmartLi 3.0 lithium battery cabinets. When multiple cabinets are connected in parallel, only the master cabinet has an LCD.

Can a battery cabinet be deployed outside a smart module?

Battery cabinets or racks can also be deployed outside smart module A (batteries deployed outside) or smart module B. The front door is a single door, and the rear door is a double one. Shoto batteries are supported.

What happens if a battery module is not charged or discharged?

When the operating temperature is below 0°C, the battery modules switch off the charge and discharge circuits. As a result, the battery modules cannot be charged or discharged. Start the air conditioner to heat the battery modules to 3°C or above, and the charge and discharge will be resumed.
