

The folks at Ninedot Energy are comfortable solving complex puzzles- the company's name comes from one, after all. So it should come as no surprise that the leading ...

RES energy storage projects feature our innovative energy management system, RESolve. Developed in-house by our experts, this state-of-the-art software has been proven to maximize potential revenue streams. Plus, our integrated team ...

Sourcing a pipeline of high quality energy storage projects can be difficult, but we've built a platform across the US. Investors are looking to acquire energy storage projects using robust ...

Following similar pieces the last two years, we look at the biggest energy storage projects, lithium and non-lithium, that we've reported on in 2024. The industry has ...

The expansion of Moss Landing Energy Storage Facility in California, already the world's biggest BESS project, to more than 3GWh was one of the highlights of the first half of this year for the US energy storage industry. Image: Vistra Energy. A roundup of the biggest projects, financing and offtake deals in the energy storage sector that we ...

One such policy change took place in 2022 with the passage of Assembly Bill 2625, which amended zoning laws to open pathways for easier siting of energy storage projects. ...

Solar and energy storage system integrator CS Energy said last week that it has been selected by an unnamed independent power producer (IPP) to work on a hybrid DC-coupled 5.1MW solar PV power plant with 2.5MW of battery storage in the New England state. CS Energy will be prime contractor performing engineering, procurement and construction ...

Governor Kathy Hochul announced over \$5 million is now available for long duration energy storage projects through New York State's Renewable Optimization and Energy Storage Innovation Program. This funding is meant to advance the development and demonstration of scalable long duration energy storage (LDES) solutions that harness and ...

Carlyle's investment is intended to enable NineDot to execute on its pipeline of battery storage projects in and around New York City, including the boroughs of Queens, Staten Island, and the Bronx, as well as Long Island.

These projects will benefit from a share of over \$6.7m to develop new energy-storage technologies that

Energy Storage ProjectsBest New Energy Storage Projects

can use stored energy as heat, electricity or as a low-carbon energy carrier like hydrogen. Ranging from the development of thermal batteries to converting energy to hydrogen, the projects have been selected because of their potential to improve technology ...

RES energy storage projects feature our innovative energy management system, RESolve. Developed in-house by our experts, this state-of-the-art software has been proven to ...
