Also you are lucky perhaps because the Zorro is a radio that has an external connection for just this purpose - an extra battery. I think that plug for the external battery is the same size as a balance plug for a 2S battery - what a coincidence if you have one! Then you hang the battery under the radio with a strap and you are good to go.

A Battery Limiter or Laptop Charging Control software reminds you to remove the charger to protect your devices from overcharging. Here is a list of Battery Limiters for ...

To make the external battery the primary one, I needed to reroute its communication and power wires to the internal battery, while deactivating the external battery presence detection. With the assistance of detailed MCU pin-out references and some trial and error, I successfully reconfigured the scooter to operate solely on the external battery.

I want to calibrate a new external battery because my old one is going bad, and I got an new one that I want to put in, so what software do I have to use, or what do I have to do, to make the battery life better, that lasts hours longer, because my current one is lasting me a 1-2 hours and I want to extend those hours, so I get good battery performance.
