

What is farad power?

Farad Power Inc. was founded to develop a new class of advanced carbon materials for energy storage devices with considerable functional improvements over the current generation of commercially available electrode materials for batteries and supercapacitors.

Who is Faradion Limited?

If so, then please Faradion Limited is a company registered in England & Wales. Registration No. 07338748
Welcome to Faradion, the world leader in non-aqueous sodium-ion cell technology that provides cheaper, cleaner energy.

Are sodium ion cells a good replacement for lead-acid batteries?

Our sodium-ion cells are an excellent drop-in replacement for lead-acid batteries for low cost electric transport - in LSEVs, e-scooters or as batteries for e-rickshaws and e-bikes - offering much greater range and carrying capacity for a similar price. Interested?

For next-generation high energy-density batteries, Li-sulfur batteries have great potential. We are using our carbon composite technology to synthesize pre-lithiated carbon/sulfur materials for cathode applications in Li-S batteries.

Our patented chemistry delivers a high performance, safe and cost-effective battery solution for key applications, such as transportation, storage, back-up power and energy in remote ...
