

Could a gravity battery store energy from abandoned mines?

However, earlier this month, scientists revealed a gravity battery that takes advantage of vestiges of dirty energy's past by using millions of abandoned mines worldwide (with an estimated 550,000 of them being in the U.S. alone) to store energy.

Can gravity batteries be used in mines?

Mines are well-suited to such batteries. This is because they already have deep shafts that could be used to drop a weight. Gravity batteries, require at least 300 metres of fall space to work properly. Building these projects could help generate revenue in impoverished mining communities too, the researchers say.

How much energy can a gravity battery produce in a mine?

The proposed gravity system in mines has a global energy capacity potential of seven to 70 TWh, the IAASA researchers say in the article, published in *Energies*. Solar power is key to the energy transition. But where can we store the excess energy it produces? canva How would a gravity battery in a mine work?

Can a Pyhäjärvi mine be used to build a gravity energy store?

A Scottish company is using the Pyhäjärvi mine to build its first full-scale prototype gravity energy store. One of Europe's deepest mines is being transformed into an underground energy store. It will use gravity to retain excess power for when it is needed. The remote Finnish community of Pyhäjärvi is 450 kilometres north of Helsinki.

Could abandoned coal mines be transformed into next-gen batteries?

According to the BBC, some companies are already investigating ways to transform abandoned coal mines into next-gen batteries. However, others find the geographic limitations of mine-based gravity batteries could limit the adoption of the technology worldwide.

What happened to gravity battery?

The mine was opened in 1962, extracting more than 60 million tonnes of ore over its lifetime. Once a major employer in the region, it closed in August 2022 leaving many unemployed. The gravity battery is one of several community-driven projects at the mine aimed at breathing new life into the area.
