

How to check the model of battery pre-charging cabinet

How does the batteryguard cabinet work?

The Batteryguard cabinet is also safe and easy to use for new personnel. It's simple: when you need to charge up your battery, you just open the cabinet and place the battery on the charger. Because the charger cables are fixed in the cabinet, you can be sure that you are always using an original charger for the battery.

What is a battery line safety storage cabinet?

The BATTERY line safety storage cabinets are specially designed for safe storage and charging of lithium-ion batteries.

How many batteries can a batteryguard cabinet hold?

Whether you have a great many batteries or just a few, large or small, the Batteryguard cabinet offers a solution for every situation. We offer compact models that charge 2 to 10 batteries and a spacious double-door safe where you can store up to 20 batteries.

Why do I need to close the cabinet doors if a battery catches fire?

Because the charger cables are fixed in the cabinet, you can be sure that you are always using an original charger for the battery. It is important that you always close the cabinet doors, because if a battery catches fire, that fire is kept inside.

Why should you choose a battery line?

With its Type 90 classification and explosive burning of batteries in the interior tested by the independent Fraunhofer Institute, the BATTERY line provides double fire protection. All safety-related components are not subjected to day-to-day dynamic loads and are thus free of attrition and mechanical wear.

When purchasing a lithium-ion battery charging cabinet, it's vital to consider safety, compliance, and long-term usability. Justrite's Lithium-Ion Battery Charging Safety Cabinet is a top choice ...

charge the battery inside the model plane, inside of one's car, home furniture or wood floor/carpet, or anywhere near flammable material. Monitor the charging of the battery pack at all times and ...
