How to check the new energy battery number

How do I read the date code on my car battery?

You can read the date code on your car battery by locating the label, identifying the format of the code, and interpreting the letters and numbers to determine the manufacture date. Understanding the date code enables you to assess the age and remaining life of your battery. First, locate the label on the battery.

How do you know if a battery has an expiration date?

The expiration date of a battery can be determined from its code. The code usually consists of a combination of letters and numbers that indicate the month and year of manufacture. The expiration date can be calculated by adding the warranty period to the manufacture date. What does the date code on a US battery represent?

How do I know if my car battery is old?

The easiest way to find out the age of your battery is to locate the battery under the bonnet. Many batteries have a date on top of them which shows when they were manufactured. This date will help you figure out how old your car battery is. However,if the battery is undated,you can find a code on the battery or battery cover.

How do you know if a battery is made?

Unfortunately,there is no standard code,but the first two digits usually show the manufacture date. As with the round sticker above,a letter will indicate the month,while the number represents the year. The other characters in the code tell you which factory produced the battery,along with the day and time of manufacture.

How do I know if a battery has a manufacture date?

Sometimes letters are used for the month. Here, the letters will range from A to M, with A meaning January, B meaning February, etc. Note that this is the manufacture date, not the in-service date. Table for checking the letters and numbers to get the battery manufacture date information.

How do I know if my battery has a 5 digit code?

Five-character code is engraved on the top of the battery. The first two characters will be a letter and a digit,giving the month and year. A five-character sticker in the top left corner of the battery. Again,the first two digits show the month and year of manufacture,as described in 2 above.
