

How to change the battery of an Acer laptop?

To change the battery of an Acer laptop, first, click on the power button for approximately 30 seconds to let the residual current in the circuit go out. Then, remove the battery. Wait for a minute and insert it back. Repeat this process 3-4 times. If the laptop still doesn't turn on, try running it on the charger without the battery. If it turns on properly, it's time to replace the battery. I hope this helps.

How do you replace a battery on a motherboard?

If your computer's motherboard does not have a removable battery, you must set a jumper on the motherboard to install the new battery. After purchasing a new battery, remove the old battery and replace it with the new battery.

How do I replace the built-in battery?

The device needs to be disassembled to replace the built-in battery. Since the device functions exclusively on the built-in rechargeable lithium-ion battery, other commercial products cannot be used. For the built-in battery to be changed, service is required. Go to Product Repair.

How do you know if a Sony battery board works?

Please don't say SONY original batteries board because they are so rare lol. Well I do have two at home, one already installed in my battery mod, but still.. You open up the plastic battery cover and you short the positive and negative terminals leading from the board to the cell. You'll see a small spark then you know it worked.

How do I know if a 3rd party battery is working?

You open up the plastic battery cover and you short the positive and negative terminals leading from the board to the cell. You'll see a small spark then you know it worked. I usually use a key or a screwdriver. Official 3rd party batteries had good boards from what I remember. Hey man, remember I mentioned this issue when I first made my mod?

Should I take the battery PCB out of my PSP?

EDIT: alright so you didn't take the battery PCB out of its place, which allows to avoid soldering everything to the PSP itself. That's actually a good idea, I tried to do the same but ended up breaking the pins.. I might try again some day, a fake PSP battery goes for 8 euros here in Italy so I guess I can afford that.

My original battery on my Backfire V2 was faulty so they sent me a new one to swap in. Figured why not make a walk through for swapping batteries on an elect...
