

# How to open the solar charging port in China

Does China have a public charging sector?

The public charging sector in China has undergone significant development in order to serve as a necessary element for wider Electric Vehicle adoption. This paper discusses some important numbers on current public charging facilities across China as well as their regional distribution pattern and key players.

What EV charging options are available in China?

With one of the world's largest and fastest-growing EV markets, China offers a wide range of charging options, from public fast chargers to home charging solutions. Understanding the local charging infrastructure, types of connectors, and how to efficiently find and use charging stations is key to a smooth driving experience.

Can a USB-C charger charge a portable solar panel?

For the purpose of solar charging, these specs can only handle lightweight and portable panels that operate at around 5 volts. This option doesn't make sense and is apparently not practical as a solar charging port on portable stations. Now comes the USB-C standard running under the Power Delivery (PD) protocol.

How to find EV charging stations in China?

Locating EV chargers in China is relatively easy with the help of various apps. Generally, there are two types of apps to assist in finding charging stations: Map-based Apps: Apps that provide general mapping and navigation services, such as Baidu Maps (Baidu Ditu, ????) and Amap (Gaode, ??).

How do I find a charging station in China?

In addition to map-based apps, several apps are dedicated to finding and using charging stations: e ?? (e-Charging, China State Grid): A popular app for locating public chargers, especially those operated by the state. This app requires a Chinese App Store account.

What is China's electric vehicle charging infrastructure plan?

According to the Chinese government's 14th five-year plan, an advanced charging infrastructure system will be in place by the end of 2025 to meet the demand for more than 20 million electric vehicles. Discover all statistics and data on Electric vehicle charging infrastructure in China now on [statista.com](https://www.statista.com)!
