

Picked up a zketech ebc a401 to test these new Hithium 314ah cells. If they test good, I'll probably be ordering more of them. First impressions, these are the flattest cells I own. With the grade "b" Eve 304ah cells, you can clearly see the jelly rolls.

Have to say, the Hithium cells are ruler flat and make the "grade a" 304ah Eve from 18650 look bloated. When I get some testing done, I'll probably create a new thread with the results. Of course, still have to build a heavy duty shelve that will hold 8banks of 16pcs 304ah cells, before assembling the new cells.
