

What is battery cell production?

Battery Cell Production As a supplier of turnkey production lines, we provide the complete production process for the manufacture of lithium-ion battery cells. Our expertise in automation, assembly, laser processes and integrated inspection systems enables innovative solutions for the production of pouch cells, prismatic cells and round cells.

Why is efficient battery production important?

Efficient battery production is one of the key prerequisites for a successful energy and mobility transition. From the production of lithium-ion battery cells to the assembly of battery cells into battery modules or battery packs, we have the right production solution.

What is the Targray battery division?

The Targray Battery Division is focused on providing advanced materials and supply chain solutions for lithium-ion battery manufacturers worldwide. We also advise cell manufacturers on their R&D and pilot line equipment purchases, helping identify the best tools and production processes for our materials:

Why should you use a standardized machine for lithium-ion battery production?

With our standardized machines and systems for the efficient production of lithium-ion battery cells and modules, our customers can plan their production step by step, adapt it to their own needs, optimize their processes, validate them, and expand them modularly. Our services in the battery cell production value chain.

Why do we support lithium-ion battery manufacturers?

As a company, we have been successfully supporting lithium-ion battery manufacturers to improve their production processes in terms of quality and efficiency (natural resources and energy consumption, cost, operations etc.). We know that the key to successfully addressing these challenges lies in the digitalisation of production.

What is lithium-ion battery factory of the future?

With our Lithium-Ion Battery Factory of the Future (LBF) project, we are developing highly efficient machines and processes for the fully automated production of next-generation lithium-ion batteries.

Utilizing vision-based correction algorithms, this high-precision flying welding technology performs real-time laser welding during battery motion, doubling production efficiency and reducing ...

Production Equipment for the Lithium-Ion Battery Production of the Future. We have been a leading supplier of innovative and efficient production equipment for the manufacturing of lithium-ion battery cells for many years. With our ...

Lithium-ion Battery Manufacturing Equipment. Find innovative production technology for making lithium-ion batteries and connect directly with world-leading specialists. Landline ...

Developments in different battery chemistries and cell formats play a vital role in the final performance of the batteries found in the market. However, battery manufacturing ...

As the world's largest Li-ion battery intelligent manufacturing turnkey solution provider, we provide turnkey solutions for prismatic cell, pouch cell, cylindrical cell, sodium-ion cell and solid-state cell, and have the highest market share in ...

BATTERY PACK ASSEMBLY and fitting of entire battery factories. Our aim is to offer the manufacturers of lithium-ion batteries a single source of supply for fitting their facilities with ...

Level-up your Lithium-ion battery production with proven and tailored solutions to enhance productivity and achieve the quality required by your EV market.

The previous article highlighted that global electric vehicle (EV) sales surged by 25%, reaching a record-breaking 17.1 million units in 2024.. This remarkable growth was fueled by advancements in battery technology, expanded charging networks, and strong government incentives. As EV trends continue to evolve, 2025 is set to be another transformative year, bringing both new ...

Prater Industries supplies customers with manufacturing equipment, parts, and services to address the quickly growing and diverse grinding and pulverizing challenges of lithium processing, helping them meet the demand for lithium ...

The production of the lithium-ion battery cell consists of three main stages: electrode manufacturing, cell assembly, and cell finishing. Each of these stages has sub ...

Prater Industries' particle reduction equipment is ideal for processing lithium-ion battery materials. We also customize industrial equipment and systems for processing or recovering bulk powdered and solid minerals for the EV industry.
