

What is a Lithium Gun?

The LITHIUM GUN series from HYTORC is a range of 5 battery operated models designed with an eye for quality, user-friendliness, and the best possible final result. They have torques ranging from 48 to 4,067 Nm.

How much does a Lithium Gun weigh?

The Lithium Gun from HYTORC Benelux weighs only 4.3 kg (including 36 volt battery). It is the lightest of its kind and the only one in its class. Standard, it comes with 2 batteries and a fast charging system. While one battery is used, the other can recharge to the maximum level. This way, you will never be without power and can work non-stop.

How much torque does a Lithium Gun have?

Lithium Gun models have a torque range of 48 to 4,067 Nm. All models are fitted with a gearbox with two speeds and a digital processor for setting the desired torque or rotation angle, allowing for an accuracy of 5%.

How many batteries does a Lithium Gun have?

A Lithium Gun comes with 2 batteries. The quick charger, reaction arm, and carrying case are also included in the standard package.

What is a lion gun electric torque tool?

When you need something portable and durable, look no further than the LION GUN Electric Torque Tool. It delivers torque more reliably than manual clicker wrenches and impact guns. With accurate and repeatable torque, it improves performance and safety. Powered by an 18V rechargeable lithium-ion battery, it ensures long-lasting battery life.

How do you use a lithium gun for tightening?

The LITHIUM GUN has two modes: rundown mode for quickly tightening nuts onto the surface and torque mode for tightening to the proper torque. This makes the LITHIUM GUN unique in its class and achieves speeds of up to 180 revolutions per minute with smaller models.
