

Does Russia still use the MiG-29?

Following the dissolution of the Soviet Union, the militaries of multiple ex-Soviet republics have continued to operate the MiG-29, the largest of them being the Russian Aerospace Forces. The Russian Aerospace Forces wanted to upgrade its existing fleet to the modernised MiG-29SMT configuration, but financial difficulties have limited deliveries.

What ammo does a MiG-29 have?

Armament for the MiG-29 includes a single GSh-30-1 30mm (1.18in) cannon in the port wing root. This originally had a 150-round magazine, which was reduced to 100 rounds in later variants, which only allows a few seconds of firing before running out of ammo.

How many MiG-29s are there?

The MiG-29 has also been a popular export aircraft; more than 30 nations either operate or have operated the aircraft. As of 2024 Flight Global estimates that 809 MiG-29s, of all types, are in service with air forces, making it the 5th most common active fighter. [3 ]

How much weight can a MiG-29s carry?

An improved mechanical-hydraulic flight control system allowed for greater control surface deflections. The MiG-29S can carry 1,150L (250imp gal; 300U.S. gal) under wing drop tanks and a centerline tank. The inboard underwing hardpoints allow a tandem pylon arrangement for carrying a larger payload of 4,000kg (8,800lb).

Why did the Russian Aerospace Forces upgrade the MiG-29SMT?

The Russian Aerospace Forces wanted to upgrade its existing fleet to the modernised MiG-29SMT configuration, but financial difficulties have limited deliveries. The MiG-29 has also been a popular export aircraft; more than 30 nations either operate or have operated the aircraft.

When will the mig-29mu2 be made?

As of 2018, the Lviv State Aircraft Repair Plant began domestically upgrading the MiG-29 to have multirole capability, known as the MiG-29MU2. Development was expected to be completed by 2019 and enter production in 2020. [57 ]
