

How much money does national grid make a year?

In the six months to the end of September, National Grid made nearly £2.05 billion in underlying operating profit, up from £1.80bn during the same period last year. Unite union general secretary Sharon Graham. Image: Jacob King/PA Wire

Why did National Grid's profits rise in the last financial year?

National Grid, which delivers electricity to households and businesses, previously said profits in the last financial year would be higher than expected due to inflation. The consumer price index has reached a 40-year high of 9%, with growing energy bills playing a large role in the surge.

How will National Grid's operating profit grow?

National Grid expects operating profit growth of around 10% for the full year. In terms of earnings per share (EPS) growth, the additional share count from the Rights Issue is now anticipated to largely offset this improvement. Over the following four years, EPS is expected to grow at an average annual rate of 6-8%.

How reliable was National Grid in 2022/23?

In 2022/23, National Grid delivered good operational performance with high levels of network reliability. Transmission and distribution network reliability remained steady at c.99-100% across all of our networks demonstrating the effects of our continued investment in network re-enforcement.

Why is national grid working with the government?

National Grid has been working closely with the government, industry and the regulator on how the FSO will enable long-term holistic thinking, drive progress towards Net Zero, and lay the foundations for the regulatory reform necessary to deliver a clean, fair and affordable energy transition.

How did National Grid perform in the last financial year?

The company, which is funded by levies on energy bills, saw profits rise in the last financial year. National Grid has seen its annual pre-tax profits increase by 107% to £3.4bn.
