

Can a company extract lithium from a north east site?

A company trying to extract lithium at a site in the North East is planning a £3.6m fundraise after completing a successful test of its operations. Northern Lithium says it is closer to producing the mineral that is key to batteries used in electric vehicles after completing a 30-day lithium brine pump testing programme.

Who owns Northern lithium?

Northern Lithium has up to 45 years' exclusive development, appraisal and production rights covering mineral rights owned by the Church Commissioners for England on 60,000 acres of the North Pennine Orefield in Northumberland, County Durham and Cumbria. You can find this story in My Bookmarks. Or by navigating to the user icon in the top right.

What is northern lithium?

Northern Lithium, which was founded in 2017 and is based in Wolsingham, County Durham, wants to use water extracted from under the surface in the North Pennines to produce lithium carbonate suitable for use in batteries.

Is northern lithium ready to produce lithium?

Northern Lithium says it is closer to producing the mineral that is key to batteries used in electric vehicles after completing a 30-day lithium brine pump testing programme. The company said the tests showed long-term yields of lithium that were ahead of its expectations and allow it to move to the next step of its commercialisation programme.

How much lithium does the UK need to power electric batteries?

Go here for more North East business news Automotive experts have forecast that the UK will need up to 80,000 tonnes of Lithium Carbonate Equivalent each year by 2030 to power electric batteries, with current sources of lithium being mostly in China, South America and Australia.

Will northern lithium be able to drill in geothermal waters in 2022?

Northern Lithium began drilling in May 2022 and, in September 2022, confirmed the presence of economically viable lithium encounters in geothermal waters at the Ludwell Gate project. The company is targeting 5,000-10,000 tonnes per year of battery-grade lithium in the next 5-8 years.

Green Tech has identified Thunder Bay as the potential site of a downstream processing plant. The company plans to be making lithium hydroxide, or battery-grade lithium, ...

The U.S. Department of Energy (DOE) has finalized a \$584.5 million loan guarantee for Convergent Energy and Power Inc. to support energy storage projects in Puerto ...

Northern Lithium Ltd. (Northern Lithium) and Evove Ltd. (Evove) have joined forces to produce battery-grade lithium carbonate from saline brines at industrial scale. This key milestone has been achieved using saline brines ...
