

What are low voltage app power capacitors?

Low voltage APP power capacitors are non self-healing type capacitors designed and manufactured by using latest technology and high quality material. These capacitors employ a technique where in the dielectric comprises of both sides rough, hazy polypropylene film impregnated with a non PCB liquid. The fluid is biodegradable in environment.

What type of resistor is required for discharging capacitors?

For discharging the capacitors, special high-voltage resistors type EW-22 are required. Standard resistors cannot be used! In dynamic PFC systems discharge reactors cannot be used (this would be a short circuit of the high voltage DC)! In PFC systems without filter circuit reactors current limiting reactors are required (e.g. BD-100) for the TSM.

What is the useful life of a capacitor?

The useful life of a capacitor depends very much on temperature. Proper cooling of a capacitor must ensure that the maximum temperature is not exceeded, otherwise useful life is de-graded. When configuring a circuit, one should make sure that capacitors are not subjected to heat from adjacent components (reactors, bus bars, etc.).

What happens if a power capacitor fails?

Failure to follow cautions may result, worst case, in premature failures or physical injury. Unit Rs. Unit Rs. The power factor correction or capacitance of the power capacitor forms a resonant circuit in conjunction with the feeding transformer.

What is a normal duty capacitor?

These Capacitors are designed for normal loads where non linear factor is  $\leq 10\%$ . Do not use normal duty capacitors for the application of Heavy Duty and Super Heavy Duty capacitors. These Capacitors are designed for normal loads where non linear factor is  $\leq 10\%$ .

Can I use normal duty capacitors for heavy duty & super heavy duty?

Do not use normal duty capacitors for the application of Heavy Duty and Super Heavy Duty capacitors. These Capacitors are designed for normal loads where non linear factor is  $\leq 10\%$ . Do not use normal duty capacitors for the application of Heavy Duty and Super Heavy Duty capacitors.
