

What is a portable solar charger?

A portable solar charger is used to power your device when you're away from power outlets. We took this into account when we chose to weight direct solar charging speed the heaviest in our testing metrics. It's also no surprise that some of our highest-scoring panels in this metric were chargers with the largest capacity.

Which solar panel has a DC charging output?

The FlexSolar 40W solar panel has a DC charging output, and it put out more power from this output than the USB-A output we used for our main test. The BigBlue SolarPowa 30 and Blavor 30W Foldable each have a DC charging port as well. Both of these panels performed better when charging a battery using the DC power output rather than the USB-A port.

What are portable solar panels?

Portable solar panels come in a range of sizes and capacities, from compact units that can charge your smartphone or tablet, to larger panels capable of powering laptops or even small appliances. Many models feature built-in solar power banks, allowing you to store energy for use when the sun isn't shining.
