

SOFAR Utility ESS-PowerMaster is a central energy storage, consisting of a Battery Energy Storage System (BESS) and the Smart-String Energy Conversion System (PCS). The BESS has been designed to save space and can be ...

This portable energy storage system consists of two different-sized batteries and a charger that offers both mains and USB connections. The modular system can be configured in three different ways and is therefore suitable for a wide range ...

This simple and intuitive design language matches any interior style, and also presents a pleasant surprise when it is unboxed. The specially designed antennas can be folded away to save space during transportation or storage, reducing ...

The proprietary bidirectional technology of Quasar 2 allows a user to charge and discharge their electric vehicle, converting it into an energy storage unit that can replace or supplement a home battery. Use the EV to power the home or to ...

THE FORCE is a portable power solution available in 800W, 1800W, and 2400W, expandable with an additional battery. It features a sleek design with a large LCD touchscreen, smart app integration, durable EV-grade batteries, quick-activating EPS, a built-in Hi-Fi sound system supported by voice activation, and a 1000W solar input option.

As compared to traditional wind power generation equipment, Jackery AIR-W can adapt to a broader range of application scenarios and provide a new design orientation for the micro- miniaturisation and portability of wind power ...

Sungrow, the global leading PV inverter and energy storage system provider, announced that the Company has received the prestigious 2024 Red Dot Design Award, ...

The IDC 30E is a multifunctional charging station for electric vehicles. It integrates solar power generation and energy storage into a complete system for using green electricity. It also has a high charging capacity and can be used as a wall-mounted or...

Red Dot Award: Design Concept ... Upon preparing an entry for the award, specify if the design is a professional project, or a project under the Red Dot: Next Gen Award. ... energy independent devices, energy recovery, energy ...

Red Dot Award for Energy Storage Design

Red Dot Award: Design Concept Energy and Electrification Batteries, power bank, generators, solar energy devices, wind energy devices, thermal energy devices, electric energy, ...

Find the best category for your participation in the international design competition "Red Dot Award: Product Design". ... fans, fan heater, heating pumps, humidifiers, instant water heaters, ...
