

How do I charge my lithium house bank?

To be able to charge your lithium house bank you will need to place a battery isolator or DC to DC charger in line between the starting battery and your house bank. These components will separate the two battery chemistries and allow for a proper charge to go to your lithium house bank.

How much does it cost to charge a lithium battery?

For lead-acid batteries and lithium batteries, always use a smart charger (about \$20) that will stop charging when a full charge is reached. Check the voltage first.

How to charge a rechargeable lithium ion battery?

To charge a rechargeable lithium ion battery, you need to provide it with a voltage between 3.7 Volts and 4 Volts. The battery cells are designed to withstand this voltage. You cannot overcharge the batteries, as it would damage them by overheating.
