

Are lithium stocks a risky investment?

Lithium stocks, like all commodity stocks, are closely linked to the supply and demand trends in the underlying materials they produce. All investing generally carries risk, and miners like this have specific risks based on their business model. That said, we've tried to highlight leaders in the sector based on:

What are the risks of Mining lithium?

"Probably the main risk comes from the supply side and the ability of the industry to supply the lithium units, to mine the lithium in order to supply the needs of the industry." Extracting and refining lithium are two separate processes, added Jimenez, who is a partner at iLi Markets and formerly worked at top lithium producer SQM (NYSE: SQM ).

What are lithium stocks?

Lithium stocks are listed companies that mine, refine, trade, or supply lithium to various industries. Although several tech-based firms are working on creating better battery technology, they cannot be classified as lithium shares as they do not produce or sell the soft metal.

Are lithium shares a safe investment right now?

Shares of automobile giants like Tesla and NIO give investors exposure to this rising industry and may be safer investments right now. But given the demand for the soft metal, lithium shares might be worth exploring for future-focused portfolio builders looking for untapped and high-potential UK shares.

Should you buy lithium stocks?

Having established the rationale for considering lithium stocks, it is now time to examine the top picks. Lithium supply is estimated to rise 32% in 2025, surpassing the 23% demand growth. The surplus in supply is anticipated to peak in 2027, and a deficit is expected to emerge by the end of the decade, according to industry experts.

Is there risk management in the lithium space?

At a panel hosted by Chris Berry, Daniel Jimenez of iLi Markets and Kevin Smith of Traxys discussed risk management in the lithium space. Lithium has had a good run so far in 2021, with prices rebounding since last year on the back of continuously strengthening demand from the electric vehicle (EV) sector.
