## **SOLAR PRO.** Road 4m solar street light

Are solar street lights a good choice?

Our solar street lights use the latest LED lighting technologies to guarantee a longer lifespan for your road lighting. They also operate well in cold temperatures, making them the perfect choice for outdoor lighting. Also, unlike traditional lighting, LEDs emit almost no heat, making them safer to change and more energy efficient.

Where can I use solar street lighting in the UK?

With the largest selection of solar street, car park and general area lighting systems in the UK, we have lighting for all applications. Typical applications include streets, roadways, car parks, general outdoor areas, playgrounds, storage yards, footpaths, multi use games areas (MUGA), BMX pump tracks, horse riding arenas and such like.

Can solar street lights be used on a road?

In addition, solar-powered road lighting is immune to power cuts. The road will remain well-lit even if the primary grid fails. Your solar street lights will store energy internally and light up the road for travellers through every season. We can also install temporary solar lighting for use on more minor roads.

Are solar street lights energy independent?

Become energy independenttoday with Sun-Lite. Our solar street lights use the latest LED lighting technologies to guarantee a longer lifespan for your road lighting. They also operate well in cold temperatures, making them the perfect choice for outdoor lighting.

How much power does a solar street light need?

This solar street light can be supplied with your choice of LED power. Luminaire power ranges from 30W up to 150W, an appropriate sized power system will be supplied with the system. This state-of-the-art lighting system is ideal for streets, car parks, open areas, public areas etc. Choice of column.

How many lumens does a solar street light have?

Choice of 4M,5M or 6M root mount or flange mount steel column. This powerful solar str..
