

What are solar aeration systems?

Solar aeration systems are predominantly used on large properties for dams, and they're designed to enhance the quality of the water. These systems not only provide better water quality for the animals who drink from the dam, but also for the farmers who utilise that water for their crops.

What is a solar aerator?

The SD-2-PM Solar Aerator is a device that aerates ponds up to 2.5 acres using solar power. It is made with high-quality, American-Made components and offers low-maintenance, high-volume Solar Aeration on any site. Powered entirely by the Sun, it does not require batteries, AC wiring, or an electrician, saving you time and money.

Does solar aeration save money?

When presented with these situations, investing in a solar powered aeration system can save costs. If your pond's location requires trenching and setting up more electrical service, choosing to go solar for aeration could save you weeks or months of set up time. Identifying a stagnant body of water is pretty easy.

Do you need a pond aerator?

If you don't have a natural aerator to provide oxygen, such as a flow-through watercourse or just want extra aeration for your fish, purchasing a dedicated pond aerator Oxybox system is a great way to oxygenate your water.

What is an oxybox solar aeration system?

Our Oxybox Solar aeration systems are a popular method of providing extra dissolved oxygen and increased water flow to your pond or lake water.
