

What is a people-centred energy transition in Seychelles?

An exciting people-centred energy transition is underway in Seychelles, an archipelago of 115 islands off East Africa in the Indian Ocean. Spearheaded by the Seychelles Energy Commission, the PV democratisation 2.0 project is the recipient of the Climate Investment Platform's Thomas Jensen Energy Transition Award.

Where can I find more information about Seychelles?

For more information about Seychelles, refer to the Seychelles Page and other Department of State publications and other sources listed at the end of this fact sheet. The United States established diplomatic relations with Seychelles in 1976, following Seychelles' independence from the United Kingdom.

What makes the Seychelles Unique?

Granite rocks can be found clustered along many of the inner islands' beaches, bringing with them a charm that gives the Seychelles its label as one of the most fascinating destinations in the world. The Aldabra Atoll and Vallée de Mai are two locations that are widely protected by the UN division known as UNESCO.

Why do Seychelles have high power costs?

Like many other small island developing states (SIDS), Seychelles faces extremely high and fluctuating power costs resulting from dependency on mineral oil products for power generation and fuel for transportation.

How will Seychelles meet the 2030 Agenda?

The Government of Seychelles will identify large rooftops suitable for PV installation. Consumers can then buy a share of the system and pay it back by monthly installments through electricity bills or other mechanisms. Meeting the ambitious 2030 agenda requires a paradigm shift from the traditional way of doing things.

Is Seychelles a sustainable country?

**Ambitious Climate Targets** According to the World Bank, Seychelles has a 100% electrification rate. The current electricity system is supplying power reliably to the population; however, it is oil-dependent, thus making it incompatible with future sustainable economic development.
