Do Aten racks come with a battery energy storage system?

All ATEN Racks come with a Battery Energy Storage System (BESS) Controller and High Voltage Unit (HVU) Power Supply. The BESS Controller allows for the monitoring of the battery cells within the rack as part of the overall battery management system (BMS).

What is a battery storage rack?

A battery storage rack is a type of storage solution that protects batteries with angled shelves. These shelves allow for FIFO (first in, first out) rotation, ensuring even wear. Each shelf is also equipped with a front stop and two side rails to prevent batteries from falling and getting damaged.

Why is XtremeStack a standardized battery rack?

Standardized modules lead to fewer spare parts to stock and simplified system upgrades. The scalability and exceptionally energy-efficient design also contribute to a low total cost of ownership. Compared to conventional battery racks, the batteries in the new grid | XtremeStack are stored upright and without gaps.

What is a GreatE battery rack?

When used in AGreatE's BESS systems (64 kWh to 138 kWh with a rated voltage of 358 V to 768 V) these Battery Racks can be stacked limitlessly to create the specific storage size your project needs. The difference is clear, get better results with the ATEN Pack and Rack system.

What is included in a shock protected & seismic rack?

All shock protected and seismic racks are supplied with anti-static spacers and cell clamps to minimize cell damage caused by an earthquake. For additional protection, all racks can be installed with a rubber coating for electricity insulation in the event of a spill and short circuit.

Can a battery racking system be installed with a rubber coating?

For additional protection, all racks can be installed with a rubber coating for electricity insulation in the event of a spill and short circuit. The modular battery racking system can be specified to accommodate any battery cell.
