

Why should you choose Aira solar export?

Solar power is a clean and renewable energy source, helping reduce your carbon footprint. By generating your own electricity, you can significantly reduce your home energy bills by up to 70%. With an Aira Solar Export tariff, you can receive payments for the electricity you generate but don't use.

What is Aira zero & solar export easy?

If you have a heat pump and solar panels, combining Aira Zero with our Solar Export Easy tariff provides a simple and hassle-free way of selling your excess solar energy back to the grid. This smart tariff optimises your system to automatically sell any unused solar energy at a rate set by Octopus Energy - currently 15p/kWh.

Do solar panels save money?

Save more by powering your home with air and sun. It's natural. Everybody knows that solar panels reduce home energy costs. But when you combine them with a heat pump, your savings go through the roof. In fact, by powering your home with air and sun, you can save up to £1,732 on your annual energy bills.*

What is an Aira solar export tariff?

With an Aira Solar Export tariff, you can receive payments for the electricity you generate but don't use. Solar panels safeguard you from future energy price increases. Reduced energy bills and eco-friendly features can make your home more appealing to buyers and boost its value by up to £5,400.

Does Aira offer a warranty on solar panels?

With Aira, solar panel installation is completely hassle-free. From a free home assessment to a 30-year performance warranty, everything's included. Every solar installation with Aira includes our 25 Year Panel Product Warranty & 30 Year Panel Performance Warranty.

What is Aira solar export flow?

Aira Solar Export Flow is a more financially-rewarding option for homes with battery storage. This dynamic tariff takes advantage of the wholesale electricity market, optimising your system to sell energy during price peaks and store energy during dips, maximising your savings. I already have an Aira Heat Pump.
