

Should you install solar panels at home?

Having solar panels installed at home sounds like an appealing idea. You get free electricity when the sun shines, potentially cutting your energy bills and doing your bit for the environment without having to give it much additional thought.

Should you install solar panels on your roof?

Installing solar panels isn't just about sticking a few panels on your roof. It's about designing a system that works perfectly for your home - choosing the right panels, making sure your roof can handle it, and checking all the boxes for safety. Every step matters when it comes to getting the most out of your solar PV system.

Do I need permission to install a solar panel?

Generally, any solar panel installation under 1MW is permitted without any additional approval required. Similarly to domestic installations, for no permission to be requested, there are several regulations to be met for commercial solar panel installations.

Where should solar panels be installed?

When it comes to solar panels, the best spot is usually right on your roof. Rooftop installations are the most common choice because they make the most of the available sunlight, helping you produce more energy and save money in the long run.

What is needed to install solar panels on UK homes?

Here's a quick guide to what's needed to install solar panels on UK homes: An installer should visit to determine if the property is suitable for solar panels. They will look at the size and orientation of the roof to decide the best location and angle for installing panels.

Should you hire a certified solar panel installer?

Your solar panel system installation should be quick, efficient, and minimally disruptive to your life and home. To make sure your panels go up without too much fuss - and are set up to generate the most electricity possible - you should hire an accredited, certified installer, like Sunsaver.

Buildings will also need to be structurally sound to have wall-mounted solar panels installed, but installers usually make sure of this before starting any work. And if you live in a listed building, you probably won't be ...
