

How much does wholesale electricity cost in 2021?

Against this backdrop, in spring 2021, European wholesale electricity prices surged steadily from about EUR50 MWh ⁻¹ to over EUR150 MWh ⁻¹ and even EUR200 MWh ⁻¹ by late fall, with prices above EUR100 MWh ⁻¹ becoming prevalent in many markets ¹ (Fig. 1d).

Can power markets withstand energy price shocks without compromising climate goals?

The sudden electricity price increase in Europe in 2021 raised concerns about the ability of power markets to withstand energy price shocks without compromising climate goals. This study shows that countries with larger shares of decarbonized electricity were not more exposed to natural gas price shocks.

Why do electricity prices go negative?

At times of oversupply, price needs to fall to persuade flexible generators to reduce output, interconnectors to export, storage systems to charge up, or customers to use more electricity. One reason prices go negative rather than fall to zero is due to the support schemes in place for wind farms.

Are negative power prices on the rise?

Their frequency has more than tripled from the year before, and this coincides with the highest ever payouts for wind farms not to generate (so called curtailment payments), which exceeded €300 million in 2023. Negative power prices are not just on the rise in Britain, they are becoming commonplace throughout Europe.

Can natural gas price surges affect electricity prices?

An electricity market is vulnerable to natural gas price surges if spikes in the price of this fuel frequently and substantially impact the wholesale electricity price. The extent to which this occurs can depend on seasonal and hourly fluctuations in demand.

How many hours of electricity are there in 2021?

For each country i and for each hour t , we have the hourly day-ahead wholesale electricity price (in units of EUR MWh ⁻¹), hourly generation by technology (in units of MWh) and hourly load (in units of MWh) from 1 April 2021 through 31 October 2021, comprising a total of 5,136 hours.
