

Can Sri Lankan graphite be used for lithium battery production?

A preliminary national study carried out by the State Ministry of Skills Development, Vocational Education, Research & Innovations found that Sri Lankan graphite can be used for Lithium Battery production in Sri Lanka. It was revealed local production of Lithium Batteries with high capacity would attract markets from across the world.

What are lithium batteries used for in Sri Lanka?

Lithium batteries are rechargeable and provide a safer and more consistent power source for electronic devices and appliances in Sri Lanka. They are used in a variety of industries, including medical, industrial, and consumer. We are one of the best Lithium-Ion Battery Manufacturers in Sri Lanka for delivering the best quality product.

What is lithium battery?

Lithium batteries are a vital component in various established and emerging appliances such as electric vehicles, consumer electronics, the medical industry, and the grid-scale energy space in Sri Lanka. Besides our battery's widespread usage, its performance, longevity, and price are standardized optimally.

Will lithium batteries attract a global market?

It was revealed local production of Lithium Batteries with high capacity would attract markets from across the world. State institutions and government funding will be used as capital for the state-owned enterprise which will be set up for this purpose.

How long does it take a battery to charge in Ceylon?

The batteries are tested at a rate of C/5, meaning five hours to charge and five hours to discharge, hence completing about two full cycles per day. The outstanding performance of Ceylon's vein graphite material against the current commercially used synthetic graphite is due to the high crystallinity of Sri Lankan vein graphite.

What are the benefits of lithium ion batteries?

The Lithium-ion battery (LIB) has significant benefits over other batteries. They have a longer life cycle, higher energy density, faster charge and discharge cycles, quick manufacturing and deploying processes, and lower maintenance requirements.
