

# The best new energy vehicle with the best battery

Which EV batteries are the most efficient?

These have been available since January 2022 and they have a battery efficiency of 245 Wh per mile. 2. Fiat 500 Electric Next, we have Fiat, an Italian car manufacturer and its 500 electric model shares the second spot for the most efficient EV batteries.

Is Hyundai A good electric car?

Hyundai generally has a solid reputation regarding mechanical reliability, and it's apparent that this is following through into its electric car range. Battery tech is a critical section of electric vehicles today, and the continuous evolution of batteries will continue to transform the industry.

How efficient is a car battery?

Its battery efficiency is 258 Wh per mile, just slightly behind second-placed Peugeot and Fiat. All cars, electric or petrol, need to be repaired now and again, but ideally, you'd want repairs to come up as little as possible.

Are electric cars a good choice for UK car buyers?

Electric cars are now a mainstream choice for UK car buyers and there are plenty of excellent EVs to choose from on the market. The best electric cars on sale come in all shapes and sizes with first class EV options available right through the market's various sectors from small cars and family SUVs to executive saloons and luxury cars.

Is there a revolution brewing in batteries for electric cars?

There's a revolution brewing in batteries for electric cars. Japanese car maker Toyota said last year that it aims to release a car in 2027-28 that could travel 1,000 kilometres and recharge in just 10 minutes, using a battery type that swaps liquid components for solids.

Which EV car should you buy in the UK?

Currently, the car that best sits in the middle of this Venn diagram is the MG 4 EV, but there are more affordable electric cars soon set to arrive on UK shores that'll provide some stiff competition, such as the BYD Dolphin and the Ora Lightning Cat. Another thing to bear in mind is charging speed.
