

Why is the battery wrapped so only the bottom open?

The positive is isolated, but most of the battery casing is the negative, hence why it's wrapped so only the bottom is open for contact. There is a chance for a short.

Why do I need a protective wrapping around the battery?

You need those protective wrappings around the battery so the only contact points on the battery are the positive and negative opposite each other. The positive is isolated, but most of the battery casing is the negative, hence why it's wrapped so only the bottom is open for contact. There is a chance for a short. Don't use it.

Do batteries produce gas when charged?

Batteries produce gas when being charged and it has to vent somewhere otherwise the battery would explode. Possibly. Remove them both. They are the breather plugs. Batteries produce gas when being charged and it has to vent somewhere otherwise the battery would explode. Possibly. Remove them both. It says plug, not plugs? It says plug, not plugs?

How does a car battery vent work?

Basically cars have different battery set ups so they have a vent on each side to accommodate..for example, if the car battery goes in the boot compartment you can sometimes have a pipe which vents the gas externally...sometimes the pipe is on the left and on other cars on the right.

Can a battery explode if it's charged?

They are the breather plugs. Batteries produce gas when being charged and it has to vent somewhere otherwise the battery would explode. Possibly. Remove them both. They are the breather plugs. Batteries produce gas when being charged and it has to vent somewhere otherwise the battery would explode. Possibly. Remove them both.

Is it possible to remove the plugs from a car battery?

Possibly. Remove them both. They are the breather plugs. Batteries produce gas when being charged and it has to vent somewhere otherwise the battery would explode. Possibly. Remove them both. It says plug, not plugs? It says plug, not plugs? We can only see half the battery. ETA I see there is only one label. Just remove the single plug.
