

Why is Ukraine investing EUR140 million in energy storage?

The EUR140 million total investment aims to enhance power grid stability, bolstering Ukraine's energy security and independence. The project will be the biggest operational energy storage portfolio in Eastern Europe at the time of commissioning.

How many energy storage plants are there in Ukraine?

The six energy storage plants will be located at multiple sites across Ukraine, with capacities ranging from 20 MW to 50 MW and a total capacity of 200 MW. Together, they will store up to 400 MWh of electricity - enough to supply two hours of power to 600,000 homes (equivalent to roughly half the households in Kyiv).

What is Ukraine Energy Initiative?

Our both local and international members are working together to share and consolidate expertise, create new decarbonisation road maps for Ukraine and accelerate development of new projects and capital deployment. Ukraine Energy Initiative is open to willing partners, who are committed to our principles and goals.

Why is Fluence partnering with Ukraine?

The partnership with Fluence further signals our commitment to leading the way in battery storage, both in Ukraine and across Europe. Together, we will deliver state-of-the-art technology that will strengthen Ukraine's energy infrastructure.

The Energy Act for Ukraine Foundation, for example, is building 20-kilowatt solar assets with 40 kilowatt-hours of storage to support mostly hospitals and schools. As the ...
