Unable to enter the system with battery inserted

Once it is on, even if the battery has been inserted after the laptop is turned on, if i remove the ac adapter, the laptop powers off completely. I have tried a new battery but that also wont work. The battery icon shows that there is no battery inserted but it says plugged in and charging but doesnt give a percentage of battery life.

Access BIOS: Restart your laptop and enter the BIOS/UEFI settings (usually by pressing F2, F10, or Del during startup). Check Battery Status: Look for a battery status ...

One idea, don't do it. Flashing the BIOS with a dead battery is asking for problems. If for some reason the system loses power during the update, your system is bricked and only a new motherboard can fix it. Even with a good battery unless you are having a specific problem that the update addresses it is better to leave well enough alone.

Enter the following command to create a high-performance power plan: `powercfg -duplicatescheme 8c5e7fda-e8bf-4a96-9a85-a6e23a8c635c`

7) Hover over battery icon in system tray, it should now indicate that it is charging. 7a) I observed the battery icon showed 10% battery (before I started step 1 it read 8%) and animated to show white overtaking black space in the battery icon. After a short while, the icon stopped animating and simply displayed the time until the battery was ...
