

Is a battery energy storage system coming to Vietnam?

In September, solar and storage EPC and O&M provider Borrego selected Gotion High-Tech as a supplier of DC-block battery storage equipment for projects in the US, with deliveries scheduled to begin next year. Meanwhile, in Vietnam, the market for battery energy storage systems (BESS) has yet to take off.

Can battery energy storage systems stabilize Vietnam's grid?

Sunita Dubey and Hyunjung Lee share how Vietnam is leveraging Battery Energy Storage Systems to stabilize their grid and accelerate the energy transition.

What is EVN's 50 MW battery energy storage system?

EVN's 50 MW Battery Energy Storage Systems (BESS) pilot project, in collaboration with ADB and GEAPP, aims for 300 MW by 2030. Vietnam is the fastest-growing energy market in Asia, according to the International Trade Administration. The government anticipates a 10-12% annual surge through 2030 in the nation's power consumption.

What is battery energy storage system (BESS)?

Battery Energy Storage Systems (BESS) play a pivotal role in addressing these challenges by minimising the intermittency of renewables, enhancing grid flexibility, and ensuring reliable power supply. In a significant development, Vietnam Electricity (EVN) has secured approval for its first pilot BESS project with a capacity of 50 MW/50MWh.

Why should Vietnam invest in energy storage?

Vietnam's innovations and recent developments in the energy sector emerge as an inspiration for the global drive towards a cleaner and more sustainable future. The nation's strategic approach to energy storage exemplifies the significance of collaboration, blended financing, and aligning initiatives with national plans.

How is Vietnam advancing its energy infrastructure towards an energy-resilient future?

Vietnam is advancing its energy infrastructure towards a greener, more just, and energy-efficient future, simultaneously providing a valuable model inspiring the global drive towards an energy-resilient future.

The extreme weather and natural disasters can cause outage of power grid while employing mobile emergency energy storage vehicle (MEESV) could be a potential solution, especially for critical loads in disaster relief. In such situation, the speed to build up the MEESVs system is a key point, which requires starting the emergency power networks in a simplest way. That ...

Currently, the commonly used emergency power protection equipment is mainly based on diesel generator sets, while there is also flywheel energy storage equipment in the application of emergency ...

Commercial and Industrial sector remains a top segment for energy storage demand, considering electric vehicle (EV) charging infrastructure as a major sub-segment. According to projections by the McKinsey Center for Future Mobility, ...

US vehicle-to-grid (V2G) technology company Nuvve has entered a strategic partnership with Chinese battery and energy storage solutions manufacturer Guangzhou Great Power. The agreement will see Nuvve's ...

Vietnam's energy storage sector will be a beneficiary of US\$35 million funding from the Asian Development Bank (ADB) and non-profit Global Energy Alliance for People and Planet (GEAPP). The two organisations have ...

Currently, GEAPP is testing a battery energy storage system that integrates with the national grid for the first time, in collaboration with the Asian Development Bank, Rocky ...

In the era of global energy shortage and increasing environmental standards, the emergence of mobile energy storage vehicles symbolizes that energy security and emergency response have entered a new ...

A bidirectional EV can receive energy (charge) from electric vehicle supply equipment (EVSE) and provide energy to an external load (discharge) when it is paired with a similarly capable EVSE. Bidirectional vehicles can provide ...

A recent report by the U.S. Trade Development Agency (USTDA) showed that BESS can be useful in fluctuation suppression, loading following, time-shifting, peak saving, ...

Marubeni Corporation, through its wholly-owned subsidiary Marubeni Green Power Vietnam Co., Ltd, has commenced a battery energy storage system ("the BESS") demonstration project in the Socialist Republic of Vietnam (hereinafter, "Vietnam").

How do traffic police mobilize people, vehicles, and civil equipment in emergency situations in Vietnam? Pursuant to Article 68 of the Road Traffic Order and Safety Law 2024 which stipulates the mobilization of ...
