What can I do with an MSc in energy storage?

Our MSc Energy Storage programme will enable graduates to embark on a professional career in energy storage with the high-level skills needed to meet emerging challenges. For example, large-scale renewable energy from non-dispatchable wind and solar energy has begun to threaten the operation of existing electricity networks in several countries.

What will I learn in the energy management course?

You will be introduced to the essential areas of renewable energy, energy management, distributed energy resource management and energy storage technologies. A vital feature of the course is our staff; you will be taught by published academics who will enhance your learning experience with research-led teaching.

Where can I study energy storage?

Join us and study at the top university in the UK and Ireland. MSc Energy Storage provides the expertise to fulfil the expectations of an energy storage market that is predicted to grow to \$250 billion by 2040. Get in-demand expertise with a funded postgrad opportunity with Ulster University Business School.

What is advanced materials science (energy storage)?

Advanced Materials Science (Energy Storage) MSc relates scientific theories to research and applications of advanced materials, encourages innovation and creative thinking, and contextualises scientific innovation within the global market and entrepreneurship.

What is energy storage?

Get in-demand expertise with a funded postgrad opportunity with Ulster University Business School. Energy Storage is a rapidly developing field of study within academia and industry in response to the need to decarbonise our energy systems through renewable energy. Bloomberg New Energy Finance predicts explosive growth over the next 12 years.

How do I get an MSc in energy storage at UCL?

Upon successful completion of 180 credits, you will be awarded an MSc in Advanced Materials Science (Energy Storage). Details of the accessibility of UCL buildings can be obtained from AccessAble. Further information can also be obtained from the UCL Student Support and Wellbeing Services team.
