What is a new energy vehicle?

Wuling The Chinese government began using the term new-energy vehicle in 2009 to denote all plug-in electric vehicles,grouping them together as a way to raise awareness of vehicles powered either fully or predominantly by electricity. New-energy vehicles encompass plug-in hybrids,full-battery electric vehicles,and fuel-cell electric vehicles.

What is a battery-electric car?

Battery-electric vehicles are all-electric. They are powered solely by a battery that powers an electric motor to make the car move. This battery is charged externally by plugging the vehicle into a charger installed at your home or in public. Because it doesn't have an engine,it doesn't release exhaust emissions into the atmosphere.

What type of battery does an EV use?

The majority of electric vehicles are powered by a lithium-ion battery pack,the same type of battery that powers common electronic devices like laptop computers and cellphones. However,the units powering EVs are massive and usually span the area of the vehicle's floor between the front and rear wheels.

Do electric cars have battery packs?

Electric vehicles have been on the market for over a decade,but for most car shoppers it's still a new and unfamiliar technology,and that goes double for the battery packs that power them.
