Why should you buy a PPS power station?

Unlike a conventional power bank, the PPS has both USB ports and 220V sockets. That is, you can charge not only smartphones, but also house and computer equipment, routers, flashlights, etc. "The power station is needful in cases when you need to recharge several pieces of equipment and when everything at home is 'bound' on electricity.

What is a portable power station (PPS)?

What is it actually? In layman's terms, a portable power station (PPS) is a powerful power bank with a capacity of 50,000 to 1 million mAh. Unlike a conventional power bank, the PPS has both USB ports and 220V sockets. That is, you can charge not only smartphones, but also house and computer equipment, routers, flashlights, etc.

What can be connected to a power station?

After all, gas boilers, electric kettles, laptops, water heaters, etc. can be connected to it. This is to avoid being left not only without lights, but also without heat and basic comfort during rolling or emergency power outages," explains Valentyna Komarova, Marketing Director at Citrus. How is the power station powered itself?
