

Where can I get custom solar street lights for highways

Can solar street lights be used on a road?

In addition, solar-powered road lighting is immune to power cuts. The road will remain well-lit even if the primary grid fails. Your solar street lights will store energy internally and light up the road for travellers through every season. We can also install temporary solar lighting for use on more minor roads.

Where can solar street lights be installed?

Installation of our Sfiro solar street lights across road networks and parking areas in the United Arab Emirates. The Eos solar street light has a classic design to blend in with existing neighbourhood lantern lighting fixtures. A beautiful example of how our Helios Solar Street lights can be installed in coastal off-grid areas & roadways.

What is solar street lighting?

Solar street lighting is an excellent solution for temporary or essential works lighting. Solar lights, using redeployable solutions such as the below concrete blocks, can be installed quickly without the need for a mains connection, providing immediate illumination. This flexibility is beneficial for essential work or emergency repairs.

Are solar street lights a good choice?

Our solar street lights use the latest LED lighting technologies to guarantee a longer lifespan for your road lighting. They also operate well in cold temperatures, making them the perfect choice for outdoor lighting. Also, unlike traditional lighting, LEDs emit almost no heat, making them safer to change and more energy efficient.
