

Who is responsible for the solar energy on the roof of a residential building

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

What are the building regulations for solar panels?

Some key aspects of building regulations for solar panels include: Part A (Structural Safety): Ensuring the roof can support the additional weight of the solar panels. Part P (Electrical Safety): Ensuring the electrical installation complies with safety standards.

How important is the shape of the roof for solar panels?

The shape of the roof is not important. If there is any shade over the solar panels, this can have a large effect on the overall efficiency of the system. As a result, it is important to clear the installation area of any overhanging branches, and to ensure the panels are not fitted in the shadow of a chimney or aerial.

Can solar panels be installed on a sloping roof?

Solar panels must not be installed above the highest part of the roof, excluding the chimney. Panels should protrude no more than 200 mm from the roof or wall surface on pitched roofs. These conditions will also be satisfied if panels are mounted parallel to the roof on a sloping roof. On a flat roof, they shouldn't protrude more than 600 mm.

Can solar panels be installed on a roof or wall?

The installation of solar panels on a roof or wall of a private house is considered to be permitted development (i.e. doesn't require planning permission) provided that: Panels should not be installed above the ridgeline and should project no more than 200mm from the roof or wall surface on pitched roofs.

Can solar panels be installed on a leasehold property?

If you want solar panels installed on a leasehold premises, contact the freeholder (the person or entity you pay your ground rent and service charge to). They may deny your application due to concerns over the roof's structural integrity. Small commercial premises will not require planning permission for solar panel installation.
