

Why is solar energy becoming more popular around the world?

With destructive wars being fought over our planet's limited resources, switching to renewable energy is becoming ever more relevant. Although solar power has been around for decades, it has recently experienced a surge in adoption rates. Let us explore the many reasons why solar energy is becoming increasingly popular around the world.

Why do people buy solar panels?

If you're weighing up whether to take the plunge, here are the top reasons people gave us for adding solar power to their home. Being more environmentally friendly and combatting the high cost of grid electricity were among the biggest reasons people bought solar panels, according to our recent survey.

Are solar panels a good investment?

Using electricity generated by your solar panels guarantees that your home is running on renewable power. This isn't the case for renewable electricity tariffs sold by energy suppliers. Adding solar panels improves the energy performance of your home, too, and can boost your energy performance certificate (EPC) rating.

Why do people invest more in solar panels?

People tend to invest more when they get a lot more from their investment. Therefore, the low cost of solar panels that has been experienced in the last few years has attracted more people. People see solar energy as an affordable and reliable source of energy. No Maintenance Cost

Why should you choose a solar energy system?

A solar energy system offers you the freedom to enjoy electricity without being tied to the volatile, market-driven utility grid. Because they are self-contained, solar energy systems are the perfect solution for remote rural homes.

Why is solar energy important?

Solar energy creates free, renewable power from the sun. It's abundant and produces no carbon emissions or local air pollution. Still, about 60% of the electricity that power plants generate in the U.S. comes from fossil fuels like coal and natural gas, which we know contribute to issues related to global warming and climate change.
